La première édition des Vivium Digital Awards est un franc succès

Plus de 70 projets en faveur d'un secteur des assurances plus efficace

Le monde des assurances a pris le train de la numérisation. En lançant les Vivium Digital Awards pour couronner les projets axés sur l'efficacité de l'agence et la satisfaction de la clientèle, la compagnie d'assurances Vivium fait figure de locomotive. «Plus de 50 organisations ont soumis leur projet de solution digitale. Nous pouvons d'ores et déjà parler d'une réussite, compte tenu de l'immense enthousiasme des entreprises participantes», se réjouit Sophie Misselyn, Managing Director chez Vivium.

L'innovation est longtemps restée un parcours du combattant dans l'univers des assurances. Les clients n'étaient pas friands d'outils innovants. Qui plus est, de nombreuses start-up technologiques estimaient que le secteur manquait d'intérêt ou de dynamisme. Tous les acteurs se sont aujourd'hui rendu compte qu'il fallait changer la donne. «Notre secteur a désormais soif d'innovation. Les besoins du client évoluent

The challenge of touch point proliferation

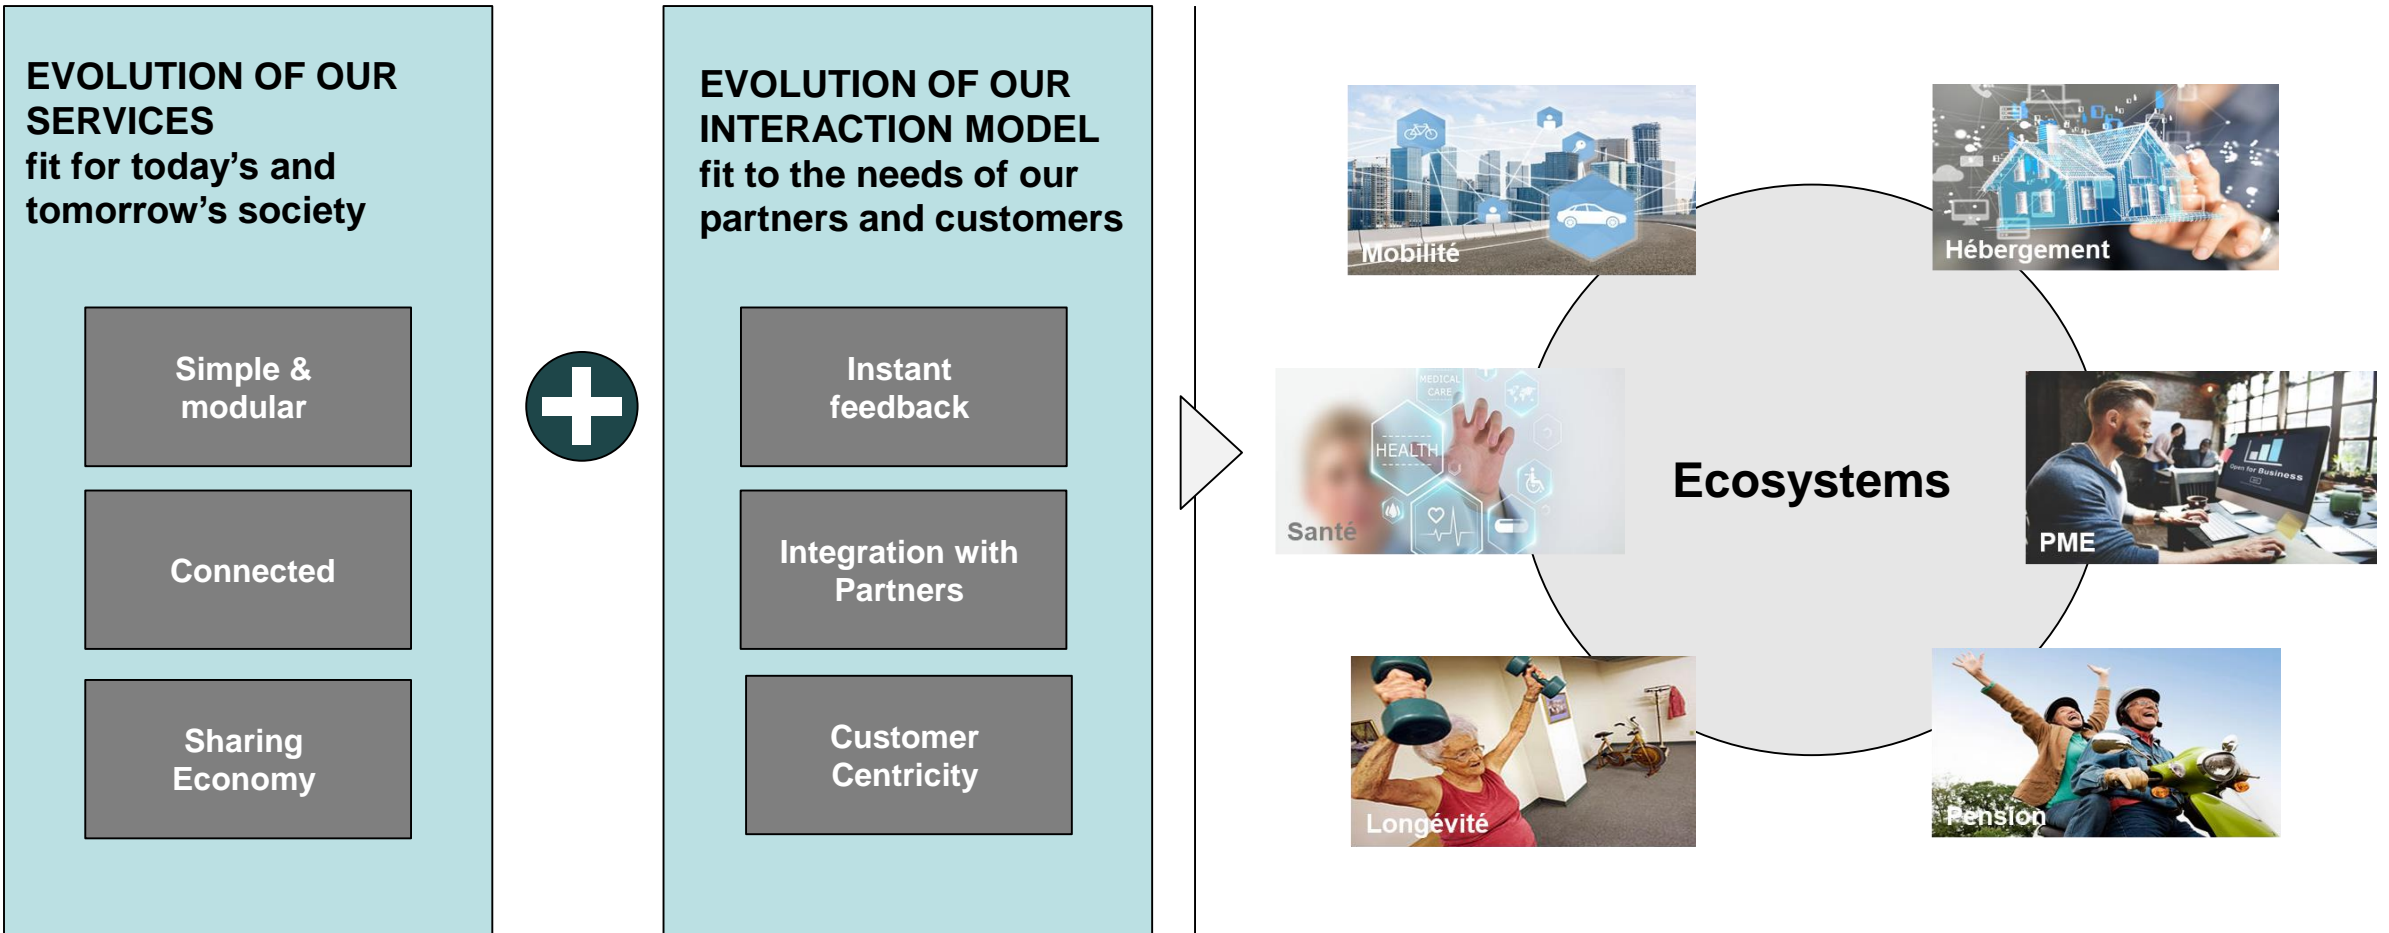

Being part of the woodwork: Ecosystems of services that offer added value to their customers.

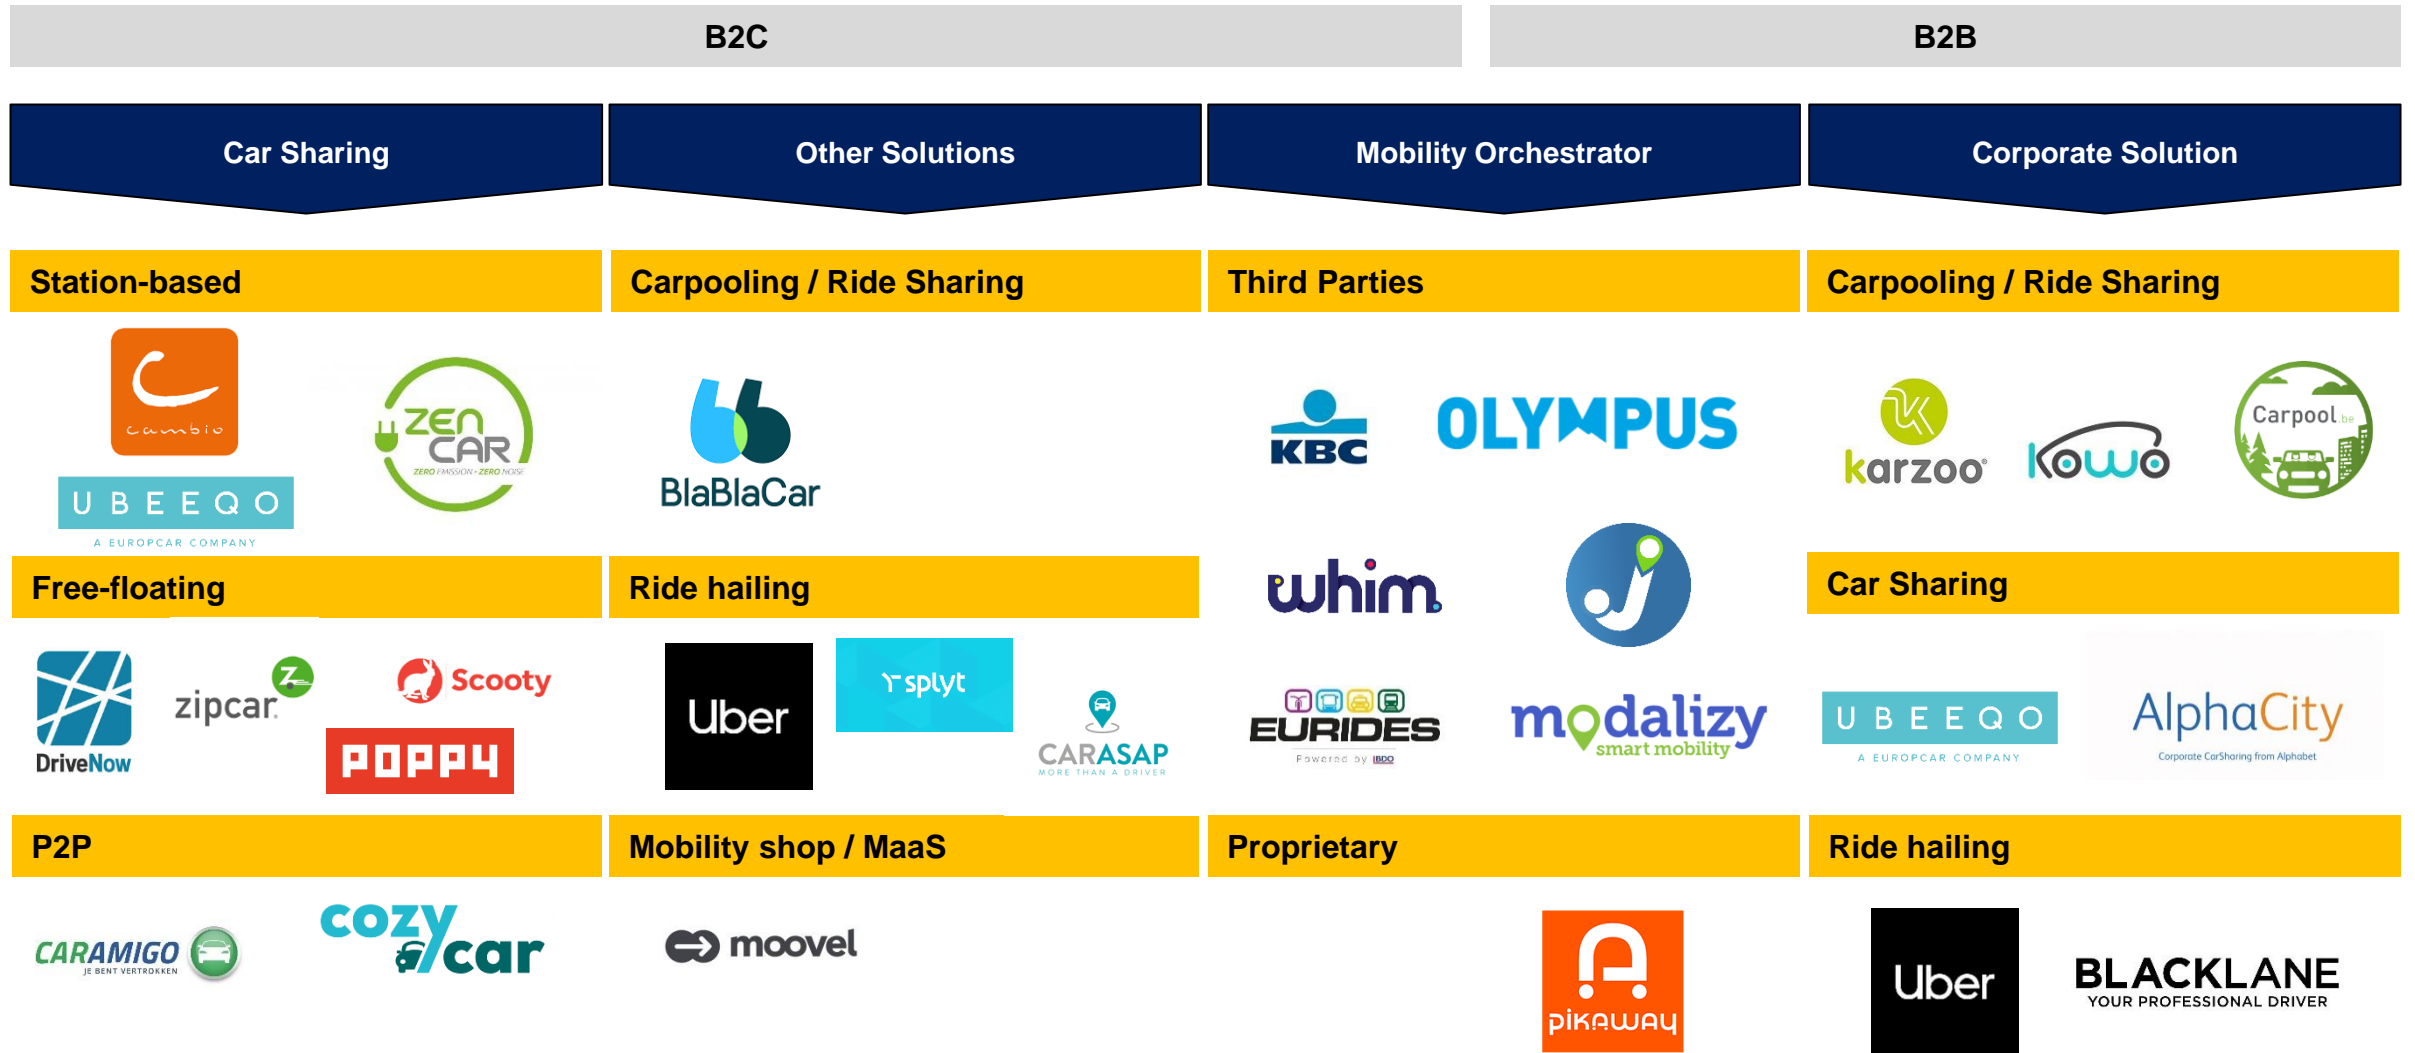

Ecosystems & Insurance:

- « **Communities** »: giving insurance customers access to information, products and services via "platforms"
- « **Ecosystems** »: through ecosystems, insurance plays a role in supporting compatible and integrated services and partners ("Insurance-as-a-service")
- « **Biosphere** »: the wider "economy" is constantly changing due to the links between evolving ecosystems

Our license to operate in today's and tomorrow's ecosystems depends on our ability to evolve the way we provide insurance services and how we cater interactions in an digital world

The need for a different set of services and interactions in Mobility: a prime example of how our society is changing the way we work and live

One segment, one need, one process: we operate on a principle of "differentiation on the outside, simplification on the inside". As a result, our internal processes remain standardized, while our distribution partners and customers benefit from differentiated experiences.

weCover: a Usage Based insurance for young drivers

The insurance cost tailored to driving habits

P&V engineered a formula which give drivers the opportunity to obtain a reduction depending on habits. For young drivers, the first year, an a-priori -40% reduction is applied on liability insurance. The second year, the reduction depends on the driving score and goes up to -50%. The price will never go above the basic tariff.

Prevention and gamification tailored to driver behaviours

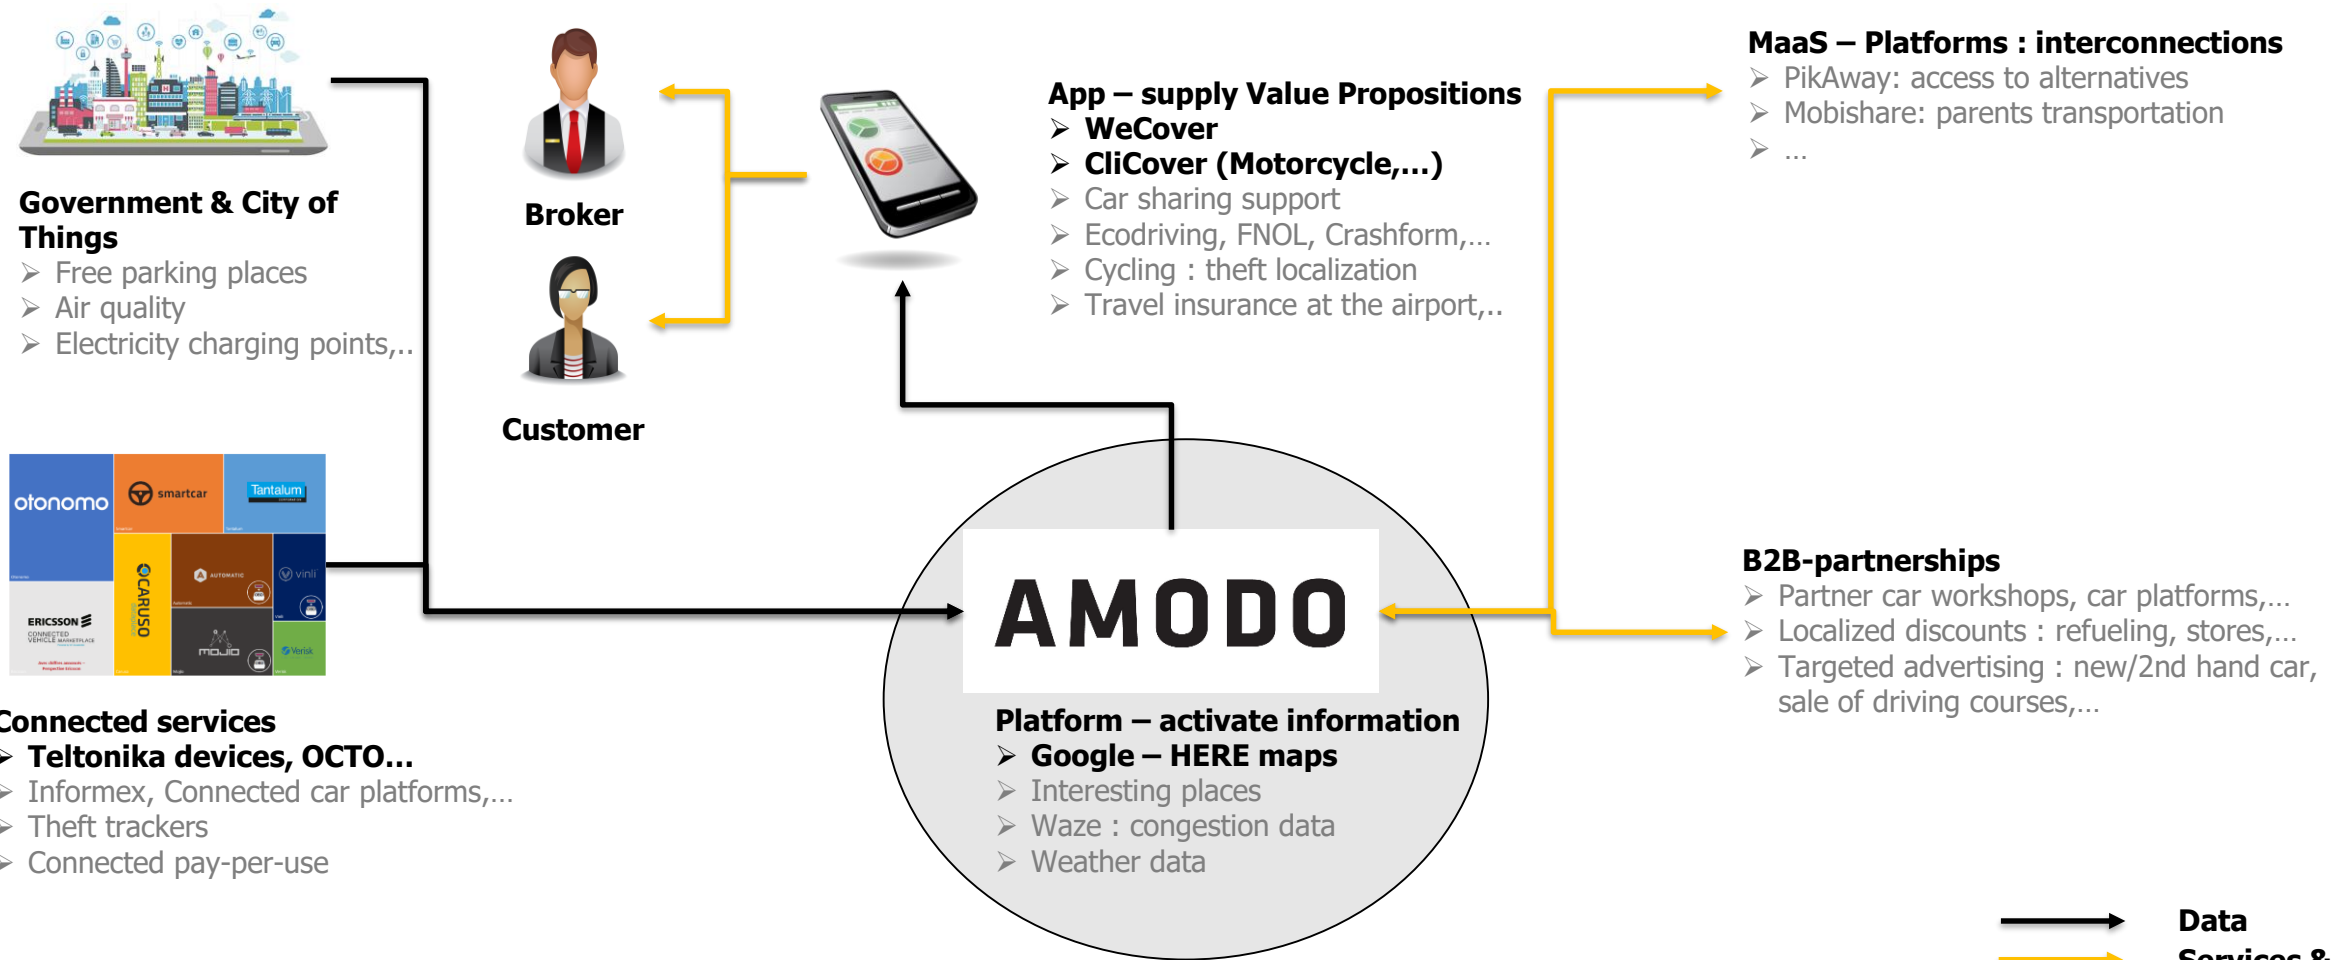

An app offers user a prevention service using gamification codes. Rewards are distributed as the user complete challenge based on driving behaviours. Other adaptation could be made through the app: fleet management, predictiv' maintenance, link to specific garage network, gaz/electric consumption...

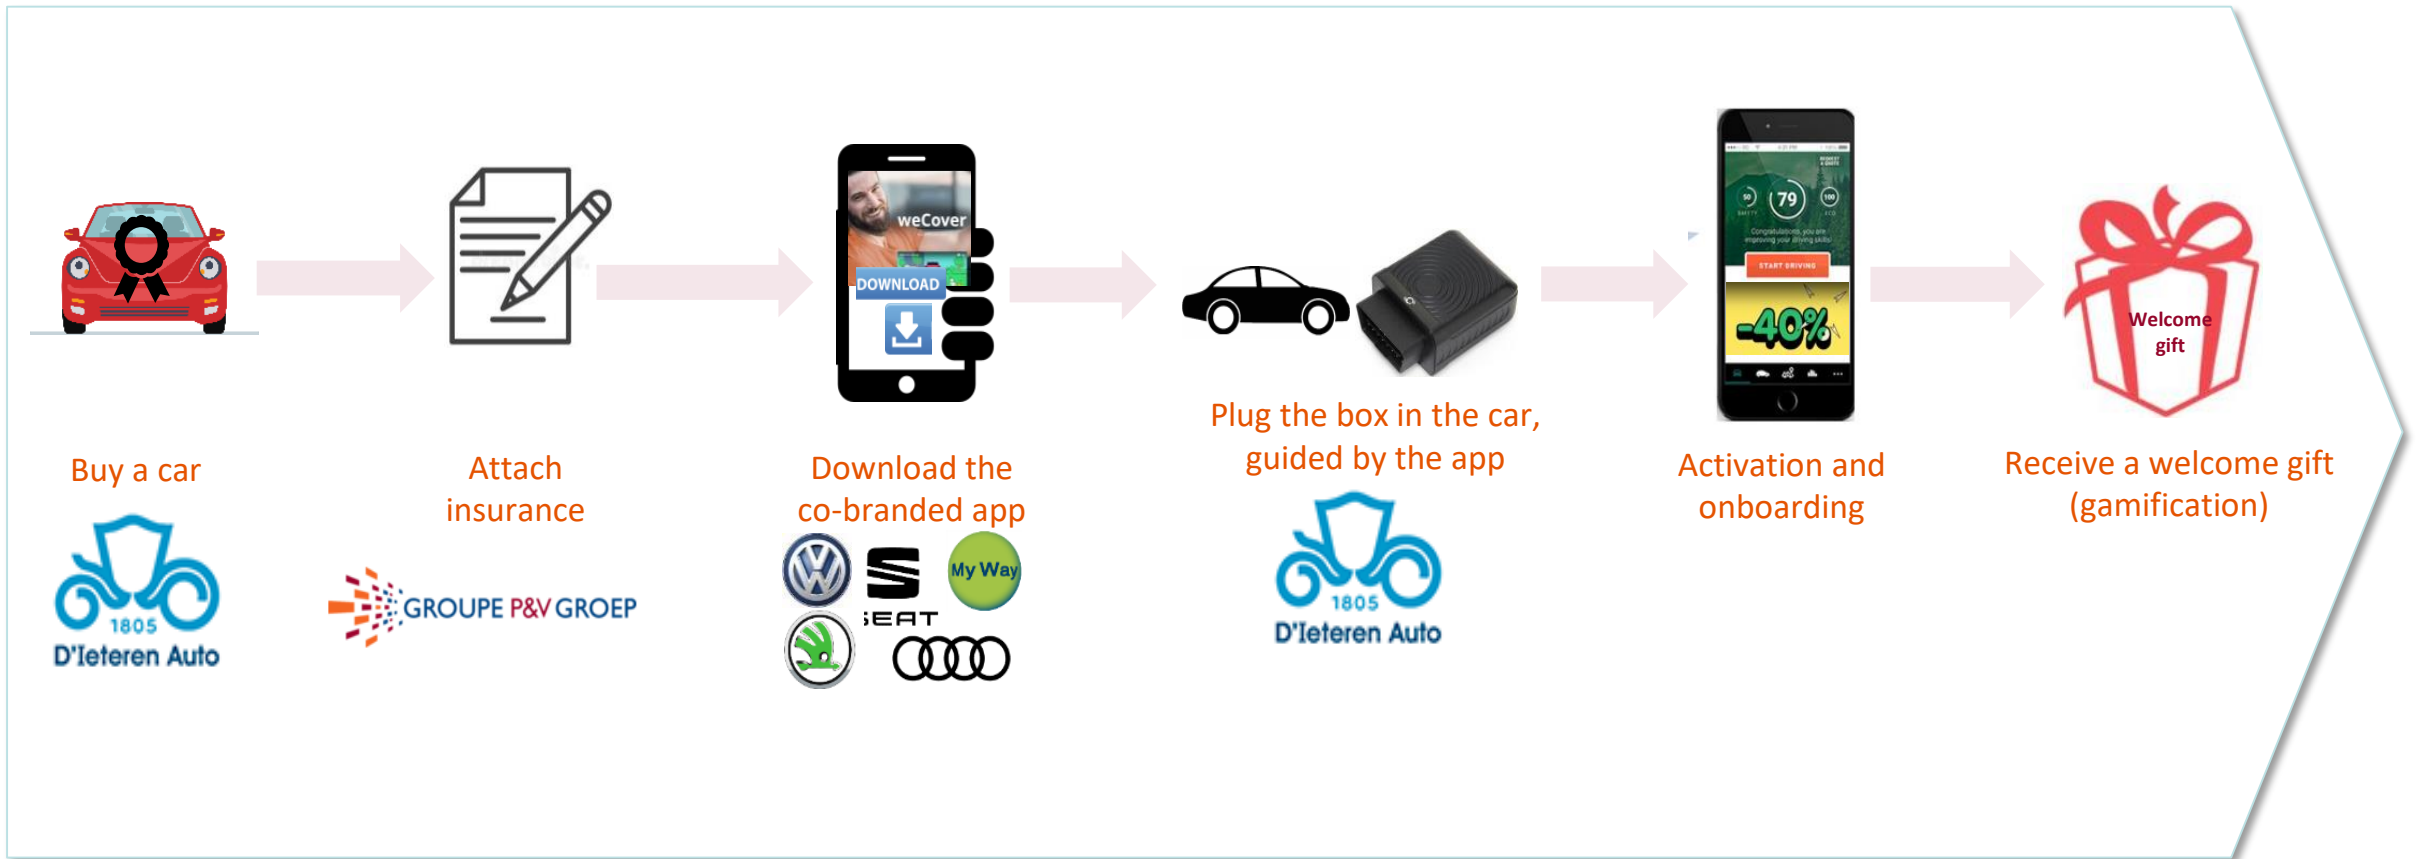

Additional services in case of loss

Theft: the car is connected to MSEurope. The border crossing is no more a limit.
Accident: procedures enable assistance as immediate troubleshooting for a shock above 4G or a call to driver to offer assistance for a shock from 2-4G.
Crash reconstruction: defend the driver interests

Mobility Ecosystem: an integrated Offer of Value Propositions, Services and Partnerships to create a virtual circle of Customer Engagement

Bonjour !

Un très grand merci pour votre participation jusqu'à maintenant. J'apprécie énormément le fait que vous nous accordiez du temps pour partager votre opinion et vos expériences.

Vous savez-vous de la **nouvelle offre d'assurance** que nous vous avons présentée lors de l'activité précédente, celle qui a été **spécialement développée pour les motoristes**? Afin de vous faciliter la vie, une **application mobile** a été développée conjointement avec cette assurance. Etant donné que nous avons actuellement encore quelques hésitations concernant la **structure, le contenu et le design** de cette application, nous voudrions vous demander votre avis!

C'est pour cela que nous allons vous montrer une **première version test de cette application mobile**.

N'attendons plus, et commençons!

Il vous faudra en dessous une petite vidéo qui vous montre quelques écrans de l'application. **Regardez attentivement cet aperçu et répondez ensuite aux questions ci-dessous** - comme vous le sentez. Le contenu n'est pas encore final à fait sur point de la plateforme est encore en phase de test. Mais considérez aussi que cette version final est encore... pour l'instant en anglais, et ne sera bien sûr plus le cas dans la version finale! Essayez donc de **ne pas accorder trop d'importance à cela**!

Envie d'en savoir plus? Regardez attentivement l'aperçu de l'application en annexe et dites-moi:

- Quels est votre premier impression sur l'application?
- Qu'est-ce que vous remarquez immédiatement? (cela peut être quelque chose de positif ou de négatif).
- Que pensez-vous de la structure de l'application? Est-ce qu'elle est claire et logique? (Sachez que précédemment ce que vous en pensez!)
- Est-ce que l'application contient suffisamment d'informations, ou est-ce qu'il vous manque certaines données?
- Est-ce qu'il y a certains éléments de l'application que vous aimeriez changer/ajouter/supprimer? Lesquels et pourquoi?

N'hésitez pas de partager ton avis de la manière la plus claire et complète possible!
