Biggest mistake of the pandemic

Back to school

” The COVID-19 pandemic has been the biggest threat to progress for children in our 75-year history. While the number of children who are hungry, out of school, abused, living in poverty or forced into marriage is going up, the number of children with access to health care, vaccines, sufficient food and essential services is going down. In a year in which we should be looking forward, we are going backward.” UNICEF
